COMPASS ROSE WORKS PRESENTS

THE AUTHOR'S COMPASS

Find Your Direction. Create Your Course.

FROM EXPERIENCE TO INNOVATION

How aviation, critical care, and dependable business processes can help authors chart a clearer course.

OCTOBER 2026 | VOLUME 1 | ISSUE 1

A free monthly publication from Compass Rose Works

Leading in Author Innovation

01 / WELCOME

Welcome aboard

A new resource for the business side of authorship.

Writing a book is a creative undertaking. Bringing that book into the world—and keeping track of everything that follows—is a business undertaking. Both deserve care, attention, and a workable plan.

Welcome to the inaugural edition of The Author's Compass, a monthly publication from Compass Rose Works. Our purpose is straightforward: to share practical guidance that helps authors organize their work, manage opportunities, and make informed decisions without losing sight of why they began writing.

What you can expect

Each issue will offer a blend of useful ideas, simple processes, examples from real-world experience, and updates on new author resources. Some subjects will be familiar; others may be new. Our goal is to make each one approachable.

You will find a recurring emphasis on follow-through. A promising bookstore conversation means little if the next step is forgotten. A successful event can be difficult to evaluate if expenses and sales are never recorded. A good checklist, a clear record, and a timely follow-up can make a surprisingly large difference.

Our guiding philosophy

Make the complicated understandable, the unfamiliar familiar, and the practical actionable. We believe good instruction should leave you knowing not only what to do, but why it matters and how to begin.

> *The destination may be different for every author. The value of a reliable compass is universal.*

02 / OUR BEGINNING

The genesis of Compass Rose Works

A practical problem became the starting point for a broader idea.

As work progressed on a memoir, Eating from Life's Buffet, an increasingly familiar challenge came into focus: authors are expected to juggle far more than manuscripts. There are contacts, events, marketing activities, inventory, sales, expenses, and commitments that all require attention.

A single task may be simple. The difficulty comes when dozens of simple tasks compete for the same limited time. Information ends up scattered among notebooks, spreadsheets, email, calendars, and memory. Important details become harder to retrieve just when they are needed.

From frustration to a process

Rather than treating each missed detail as an isolated problem, Compass Rose Works began with a different question: what if authors had clearer, repeatable business processes designed around the way they actually work?

That question helped shape Author Business Manager, a software project intended to bring important author-business activities into a more organized system. It also led to free reference guides, educational webinars in development, and now this newsletter.

A wider purpose

Compass Rose Works is not simply about software. It is about helping authors approach the business of authorship with greater confidence—through education, practical tools, and thoughtful innovation.

The work is ongoing. Some offerings are available now, while others are still being developed and tested. We will share progress openly as those projects mature.

> *Innovation often begins by asking whether there is a more dependable way to do something ordinary.*

03 / MEET THE FOUNDER

A career built around decisions

Introducing Paul Cooper, founder of Compass Rose Works.

Paul Cooper's professional experience has crossed several demanding environments: emergency medical services, flight paramedicine, critical care nursing, and healthcare leadership. He is also a private pilot and an author.

In emergency and critical care, good intentions are not enough. Decisions must be supported by information, communication must be clear, and responsibilities cannot simply be left to chance. Aviation reinforces many of the same lessons through planning, checklists, and disciplined attention to changing conditions.

A different kind of classroom

These experiences influence the way Compass Rose Works approaches education. Rather than beginning with abstract business terminology, we often begin with a familiar scene: a pilot preparing for departure, a clinical team completing a handoff, or a shopkeeper keeping track of inventory.

The scene gives the learner something concrete to picture. From there, the underlying principle becomes easier to transfer to an author's day-to-day responsibilities.

Why authors?

Working on a book brought the practical challenges of authorship into sharp focus. The same habits that support reliable operations in other fields—organization, clear records, sensible priorities, and consistent follow-through—can also help independent authors.

This publication is an invitation to explore those connections together. No flight training or nursing background required.

> *Experience becomes especially valuable when it can be translated into a tool someone else can use.*

04 / TRANSFERABLE LESSONS

What the cockpit and bedside teach

Three lessons from high-responsibility environments that translate well to an author’s business.

1. Prepare before the busy moment

Pilots do not wait until takeoff to begin thinking about fuel, weather, or the route. Authors can apply the same principle before a signing: confirm inventory, pricing, payment methods, promotional materials, and travel arrangements in advance.

2. Keep a clear picture of the situation

Critical care teams constantly reassess what matters most. For an author, that might mean knowing which events are approaching, which organizations need follow-up, and what inventory is available. A current dashboard or simple weekly review can help.

3. Make the handoff dependable

In healthcare, incomplete handoffs create avoidable risk. In an author business, the equivalent may be a conversation with a bookstore that never becomes a documented next step. Record the contact, agreement, and follow-up date while the details are fresh.

These lessons are not about making authorship rigid or mechanical. They are about reducing preventable confusion so more time and energy remain available for creative work.

Try this today

Choose one recurring author task that currently depends on memory. Write down the steps, identify the information you need, and decide where the record will live. You have just begun building a repeatable process.

> *A little preparation today can prevent a great deal of turbulence tomorrow.*

The power of the checklist

A checklist is not a substitute for expertise. It is a safeguard for the details expertise can overlook.

Aviation checklists work because even experienced people can miss a routine step, especially when interrupted or distracted. Authors face interruptions too: an unexpected customer, a late shipment, a last-minute venue change, or a conversation that pulls attention away from the task at hand.

A useful checklist should be short enough to use, specific enough to prevent omissions, and organized in the order the work happens.

Example: Before a book signing

Confirm date, time, location, and table space. Check books on hand. Pack a payment method, pens, bookmarks, and signs. Verify travel details. Prepare a simple method for recording sales and expenses.

Example: After a book signing

Record books sold and remaining inventory. Enter income and expenses. Send a thank-you to the host. Note promising contacts. Schedule any follow-up while the details are still fresh.

Build your own in four moves

First, choose a recurring task. Second, list the steps in plain language. Third, test the list during real work. Fourth, remove anything unnecessary and add anything you discovered was missing.

Start with one checklist rather than twenty. The goal is a habit that saves time, not another complicated system to maintain.

> *The best checklist is the one you will actually use.*

06 / ON THE HORIZON

What comes next

A look at current Compass Rose Works projects and future resources.

Author Resource Library

Free guides and checklists are being assembled to help authors with outreach, events, contacts, inventory, consignments, income, expenses, and follow-through. Visit the website to explore available resources.

Author Business Manager

Our author-business software is in development and beta testing. The goal is to make routine recordkeeping and planning easier to manage in one coherent workflow. Features, availability, and launch details will be announced when confirmed.

Educational webinars

Future sessions are planned to connect business principles with practical examples. The emphasis will be on understanding and applying sound processes—not simply learning which buttons to press.

A monthly conversation

This newsletter will continue with useful topics for working authors, occasional behind-the-scenes updates, and links to tools worth exploring.

We welcome readers at every stage, from those preparing a first manuscript to those already managing an established author business. The common thread is a willingness to learn and improve how the work gets done.

One action for this month

Pick a single business process—perhaps event preparation or contact follow-up—and make it easier to repeat. Small improvements, consistently applied, are often more valuable than an elaborate system that never gets used.

> *Keep your destination in view, but give equal attention to the next dependable step.*

07 / UNTIL NEXT MONTH

Keep exploring

Thank you for reading our inaugural edition.

Compass Rose Works exists to help authors navigate the business of authorship with greater clarity and confidence. We hope this first issue has given you at least one idea you can put to work right away.

If you found a useful principle here, share the newsletter with another author and invite them to subscribe. The best professional resources become more valuable when they start useful conversations.

Explore Compass Rose Works

Visit CompassRoseWorks.com for the Author Resource Library, newsletter updates, information about upcoming education, and progress on Author Business Manager.

A simple challenge

Before the month ends, write one checklist, schedule one overdue follow-up, or organize one set of records. Choose something small enough to finish. Then notice what becomes easier the next time.

Thank you for joining us at the beginning of this journey. We look forward to navigating the road ahead together.

Find Your Direction. Create Your Course.
